Document 2: JP 2002-300001 A (Kyocera Corp.), 11 October 2002

Claims 1 to 3

The inventions set forth in claims 1 to 3 involve an inventive step in relation to documents 1 and 2 cited in the international search report.

Documents 1 and 2 do not disclose the lithium tantalate lens material with a birefringence of between -0.0005 and 0.0005, which comprises lithium oxide and tantalum oxide at a molar composition ratio of not less than 0.975 and not more than 0.982. Furthermore, it would not have been easy for a person skilled in the art to conceive of this lithium tantalate lens material in the light of the lithium tantalate compositions that are disclosed in documents 1 and 2.
